## CONCEALED WOOD FRAME FLASHING

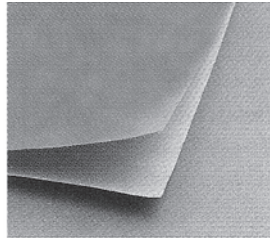

### COP-R-KRAFT + LEAD

A bimetallic flashing consisting of a copper and lead core of 2 oz. or 3 oz. per square foot (total weight of combined metal). A layer of creped kraft paper reinforced with fiberglass is laminated to one side of the bimetallic core. Cop-R-Kraft + Lead is an excellent wood frame flashing.

Size: Rolls 36" wide x 60' long  
Will slit to multiple widths

### COP-R-KRAFT

A full copper sheet weighing 1, 2, or 3 oz. per square foot bonded to a layer of waterproofed, creped kraft paper with a plasticized asphalt compound. The 3 oz. weight is reinforced with glass fibers and will meet FHA specifications.

Size: Rolls 36" wide x 60' long  
Will slit to multiple widths

## WATERPROOFING MEMBRANE

### MOISTSEAL

Moistseal is a polyvinyl chloride sheet available in 10, 20, 30, and 60 mils. Recommended for concealed applications only, Moistseal is an excellent waterproofing membrane. It will show no cracking or flaking when bent through 180° over a 1/32" mandrel and then bent at the same point over the same size mandrel in the opposite direction through 360°. The material conforms to ASTM Standards D-822 for at least 400 hours. Strict quality control assures full weight and uniform thickness.

Mil	Thickness	Roll Size*
10	.010	72" x 150'
20	.020	72" x 100 or 60" x 150'
30	.030	72" x 100'
60	.056	48" x 50'

\* Will slit to multiple widths

### APPLICATION CHART

	Copper Fabric Flashing	Cop-R-Cote	Cop-R-Kraft	Cop-R-Kraft Duplex	Cop-R-Kraft + Lead	Cop-R-Kraft Duplex + Lead	Moistseal	Peel-N-Seal	Copper Sealite 2000
A - Highest quality flashing for the job									
B - Excellent quality flashing at moderate prices									
C - Dependable and economical flashing									
D - Flashing for short term performance
