

CUSTOM MASONRY CLEANER

Concentrated concrete cleaner & brightener

DESCRIPTION AND USE

Sure Klean® Custom Masonry Cleaner removes concrete splashes, excess mortar, mud, retarders, heavy efflorescence, embedded stains, rust and surface soiling from textured custom masonry surfaces.

This concentrated, general-purpose acidic cleaner improves the color and uniformity of most custom masonry and colored concrete. When used in strong solutions, Custom Masonry Cleaner can be used for additional aggregate exposure (“weathering”)

PREPARATION

Protect people, vehicles, property, metal, painted surfaces, plants and other nonmasonry materials from product. Clean masonry before installing windows, doors, finished flooring, metal fixtures, hardware, light fixtures, roofing materials and other nonmasonry items. If already installed, protect with polyethylene before application. Sure Klean® Strippable Masking is appropriate for use with this product to protect windows. All caulking and sealant materials should be in place and thoroughly cured before cleaning.

Surface Preparation

Surface must be thoroughly cured.

Surface & Air Temperatures

Do not apply when temperature is below freezing or will be overnight.

Equipment

Apply with a soft-fibered, tampico masonry washing brush or with low-pressure spray equipment fitted with acid-resistant hoses and gaskets. Don’t use pressure spray above 50 psi. Rinsing from the bottom up, use sufficient water pressure and water volume to thoroughly flush cleaner from surfaces.

SAFETY INFORMATION

Product contains hydrochloric acid. MSDS and Spec Data sheets should be referred to prior to use.

APPLICATION

ALWAYS TEST each surface and type of stain for suitability.

Dilutions

Custom Masonry Cleaner is a concentrated cleaning solution designed for dilution with 2 to 6 parts water. Always pour COLD water into empty bucket first, then carefully add product. NEVER USE HOT WATER.

Application

1. Always preset surface with clean water.
2. Apply the prediluted cleaner directly to surface using a masonry brush or low-pressure spray.
3. Let cleaner dwell for 2-3 minutes
4. Reapply cleaner. Scrub or scrape areas of heavy soiling using wood blocks or nonmetallic scrapers.
5. Rinse thoroughly with fresh water.

COVERAGE & PACKAGING

Substrate	Type	Use?	Coverage
Architectural Concrete Block	Smooth	yes	300-700 sq. ft.
	Split-Faced	yes	
	Burnished	no	
Concrete	Ribbed	yes	300-700 sq. ft.
	Brick	yes	
	Tile	yes	
	Precast Panels	*	
Fired Clay	Pavers	yes	300-700 sq. ft.
	Cast-in-place	*	
	Brick	•	
Granite	Tile	No	300-700 sq. ft.
	Terra Cotta	No	
	Pavers	•	
Granite	Polished	no	N/A
	Unpolished	yes	300-700 sq. ft.

*Burnished Custom Masonry Cleaner is a more suitable product.
• 600 Detergent, 101 Lime Solvent or Vana Trol® may be more suitable. Always test for results. Coverage rates vary with surface texture, porosity and soiling conditions.

Available in 1 & 5 gallon containers
